right solutions.
right partner.

Imported Samples Advice Form.

This form should be completed and returned with the samples, DEFRA licence and Chain of Custody form. Samples received from outside of the UK under the ALS Environmental DEFRA licence should be placed in plastic containers where possible and where this is not possible, samples for organic analysis, should be stored in glass containers and wrapped in bubble wrap.

Each part of the consignment should have a copy of the DEFRA licence clearly displayed on the outside of the package. Failure to do this will cause samples to be stopped at customs and projects delayed.

All samples should display a label with: **DEFRA Sample.**
